The application has been amended as follows: the abstract is edited due to exceeding 150 words. In the abstract, delete "The template are created ... Uniform Resource Locator (URL) string." (lines 9-15).

2. The following is an examiner's statement of reasons for allowance: a method for personalizing a web page based on the optimum mode of learning in user profiles generated from an answer provided by users to each question resulted in a designation of a series of weights to one or more of a plurality of learning modes, wherein the weights are utilized to generate a plurality of normalized numeric learning mode ratings in the profile, and wherein a highest numeric learning mode rating in the user profile corresponds to an optimum mode of learning for the user profile is disclosed in the art. However, the same method with specific series weights comprising a base weight, an explicit weight, an implicit weight, and an associative weight was not disclosed by, and would not have been obvious to a person of ordinary skill at the time of the invention over the prior art of record.
